

The Brevard High Fine Arts Department is proposing to build a performance amphitheater for the program. The project would consist of a brick/concrete stage with wood pergola. The masonry department will build the stage and is charging the Fine Arts Department \$2,730. The Fine Arts Department will cover all expenses using club/organization funds. Total cost of the project is estimated to be \$6,000-\$7,000.

The project as planned would not interfere with any new construction planned. Fine Arts would like to get started in March and have the project completed by the end of school.

### Amphitheater Concept

\* Height of stage is one code step from the ground level.
