StrongSchoolsNC Public Health Toolkit (PreK-12)

Summary of the major revision to the Toolkit from the prior version:

- Individual contact tracing and exclusion from school after an identified exposure (regardless if the exposure occurs at school, home, or community setting) is no longer recommended statewide in PreK-12 schools, effective February 21, 2022. **This is not dependent on mask wearing or vaccination status.**
- Messaging regarding potential close contacts in school-related settings will continue to be provided. The change will be that we will notify parents with an update on a weekly basis. A weekly phone message will be provided in addition to the continued utilization of our COVID Dashboard.

Notification Method	Recommendation following notification	Communication notes
<p>Individual Investigation and Notification</p> <p><i>Current method of Contact Tracing; assesses individual length and distance of exposure.</i></p>	<p>Individuals should wear a well-fitting mask for 10 days after last known exposure, unless an exemption to a face covering applies.</p> <p>Individuals should test immediately if symptomatic and 5 days from last exposure.</p>	<p>Notification can occur by school system (call, text, email) and by contact tracing digital platform (CCTO) auto-text.</p> <p>Individuals notified should quarantine outside of school settings.</p>
<p>Group Notification</p> <p><i>No individual investigation; notification of a group with >15 minutes exposure in a given setting (e.g., class, sports team in indoor setting, lunchroom).</i></p>	<p>Group members should wear a well-fitting mask for 10 days after last known exposure, unless an exemption to a face covering applies.</p> <p>Group members should test immediately if symptomatic and 5 days from exposure.</p>	<p>Notification method school dependent e.g., blast email/phone call/note by setting (class, lunch group, team).</p> <p>Group notification does not require quarantine outside of school settings for members of the group.</p>
<p>Notification by School</p> <p><i>Notification to the school's community via a report detailing how many cases were discovered on a daily/weekly basis.</i></p>	<p>Recommend universal face coverings as long as community transmission is categorized as <u>high or substantial by CDC</u>.</p> <p>People in schools with cases recommended to test regularly (e.g., weekly) and when symptomatic.</p>	<p>To promote equity and avoid creating digital divide issues, notification of cases in school should include auto-call as well as website posting.</p> <p>Group notification does not require quarantine outside of school settings for members of the group.</p>

StrongSchoolsNC Public Health Toolkit (PreK-12)

Staff and students who have symptoms should get tested and isolate from others while waiting for a result.

- If testing is not possible, follow the guidance below as if the person is positive.
- If testing is possible, and staff/students receive a negative test for COVID-19 he/she may return to school when they feel better and are fever free for 24 hours without the use of fever reducing medication.
- If an alternate diagnosis that would explain the symptoms of COVID-19 is received from a health care provider he/she may return to school when they feel better and are fever free for 24 hours without the use of fever reducing medication.

Isolation: Staff and students who test positive and

- **Do not have symptoms** – should isolate from others for 5 days, then wear a mask for 5 additional days.
- **Have symptoms** – should isolate from others until fever-free for 24 hours (without fever-reducing medication) and symptoms are improving. Individuals should isolate for at least 5 days since symptoms began and then wear a mask for 5 additional days.
