*** 6) Describe the support provided for the recruitment, preparation, retention and training, including professional development, of teachers, faculty, administrators, and specialized instructional support personnel and paraprofessionals, including**

individuals from groups underrepresented in the teaching profession.

The primary vehicle for assessing teacher and instructional support personnel professional learning needs has been through the district's beginning teacher support program. The program meets with all BT teachers in years 1, 2, and 3 along with each mentor assigned to one of those teachers. This group provides a great cross-section of the district's teacher workforce and it is through those meetings and PD opportunities that we assess many of our teachers' PD needs. Further, we respond to those areas identified by those teachers and other licensed personnel by providing relevant and timely professional learning opportunities. In addition, our superintendent meets quarterly with the "Superintendent's Communication Council" which represents licensed staff members from each of our schools. Professional development needs and trends have been discussed analyzed through that process as well. Additionally, Title II funds are used for 1.67 teaching positions of fully licensed teachers to assist with the reduction of class sizes in an effort to improve the identified math deficit.

All new licensed employees begin their work with the school system by being part of an initial induction process. For employees with experience elsewhere, this may be just the beginning-of-year orientation while beginning teachers start with the orientation before moving into a formal induction process. Beginning teachers and mentors participate in a formal, ongoing induction process that not only provides the coaching/support required to support new teachers but provides our veteran, mentor teachers an opportunity to develop and display teacher leadership. More information about the beginning teacher support program, including the approved plan, is available online here: <https://www.tcsnc.org/site/default.aspx?PageID=2958>. In addition to formal, group induction processes for growth, all licensed staff members develop a professional development plan or PDP annually. Each employee conducts his/her own self-assessment to identify strengths and weaknesses using the state-prescribed evaluation rubric and standards. The employee then uses this data, along with input from supervisors, mentors, and/or colleagues to develop his/her PDP. The PDP is reviewed formatively at the mid-year point to check for progress and or needs to stay on track to achieve professional goals. The PDP is then evaluated at the conclusion of the year in summary to determine what, if any, progress the professional made toward goal achievement as well as what growth areas should be for the following year.
