

1 An evaluation system of students' academic performance is necessary to help ensure that all  
2 students are succeeding within the framework of the educational goals and objectives of the  
3 board. The Transylvania County Board of Education (the "board") believes that the formal  
4 issuance of student evaluations on a regular basis promotes continuous assessment of a student's  
5 performance; informs the student, his or her parents or guardians, and the school counselor about  
6 the student's performance and progress; and provides a system of notice that allows intervention  
7 strategies to be implemented if necessary to improve the student's performance. The board  
8 encourages teachers and principals to pursue innovative methods of evaluating progress.  
9

10 The superintendent or designee shall establish an evaluation system for assessing an individual  
11 student's academic achievement and progress relative to benchmarks set for students at that  
12 instructional level. The evaluation system should provide for regular communication with  
13 parents so that they may be informed and involved in their child's education.  
14

15 Teachers shall evaluate student performance and keep accurate records in order to substantiate a  
16 grade or assessment given in a course.
